

LODGING OPTIONS

The first step is to decide what fishing trip you will be taking (Driftless trout, Wisconsin River bass, etc). It is important to consult with us before choosing a location to ensure you will be lodging in an area that lines up with your fishing trip.

Note: Conditions can change between the time you book your lodging and the day of fishing, this is out of our control and apologize if we must travel a greater distance than expected to our fishing location. We try our best to ensure a short commute to your fishing location.

TROUT TRIPS: We do a good amount of our full-day guiding for trout in the Grant, Crawford, and Richland Counties. We will recommend a “hub city” for you depending on your needs and fishing preference.

WARM-WATER: This is a little more straight forward and the general list will do. If we are going to fish a section of water a greater distance from the Sauk area, we will inform you ahead of time.

CAMPING

There are endless camping options around, ranging from State Parks to mom and pop’s style on the river. If you are interested, please contact us and we will find a good fit for you.
